How Speculators Want to Gamble on Buston's Misfortane.

WASHINGTON, Nov. 11 .- The Secretary of the Treasury this morning received a relegram from the President of the Merchant's Bank, Boston, saying there is no reason for a panie if the banks stand firm. The loss is large, but it falls on persons who are gen-'erally able to stand it.

Another telegram to the Secretary, dated New York, this morning, says the disposition to create a panic is abated, and the writer gratuitously suggests that there is no need for the Secretary to do anything financially.

Information is received that the Treasury has received no losses by the fire, the funds and books being uninjured.

LATER.-Secretary Bontwell will take no action relative to the financial complications which may grow out of the Boston fire uniess it shall be deemed necessary and be reommended by Assistant Secretary Richardson and Comptroller of Currency Knox. who will examine into the condition of the Boston National Banks. The Secretary foes not anticipate any financial panies.

The latest information, that may be considered reliable, is that Langston will succeed Bristow in the Solicitor Generalship.

Bingham and the Russian Mission It is whispered in Administration circles that John A. Bingham is to be provided for by a foreign appointment, as a small token of appreciation for his services in the late campaign. The mission to St. Petersburg is the appointment agreed upon.

Gen. Hancock being the senior General in the United States service, is now being pushed by his friends for the command of the Department. of the Atlan ic, made vaccent by Gen. Meade. His sociority of rank is urged as the main reason why he should be given the most destrable of all the military departments. The old quarrels between Hancock and the President comes to the front on this occasion, and it is suggested that the latter will settle the difficulty by. abolishing the department altegether.

[For details of the great fire, see Sunday's dispatches on our third page.] New York, Nov. 11.—Associated Press Office, 11:49 a. m.—There is no truth in sensation reports now circulating that the fire in Boston has gone beyond the limits reported by this office to 6 o'clock this morning. The entire burned district is watched and the fire is well under control. Bostonians have very generally left for home, and hotels are bare of them to-day. Boston, Nov. 11 .- The new fire was

Fully Under Control about 4 o'clock this morning. Jordan & time declared a hopeless case. Shreve, Crump & Lowe were burned out. The last heard all over the city. Several other explosions, of gas apparently, occurred soon after the fire broke out, shattering the plate glass in Shreve, Crump & Lowe's store and upheaving the surface of the earth so as to crack the pavement deeply. Des-oile these terrific outbursts the firemen maintained their position in Summer street, ioing good service. Only twenty-five Bosn uremen were on duty last night, the main force being relieved by gallant men who rallied from all quarters. Between 11 and 12 about one hundred and sixty Norwich, Conn., firemen arrived, accompanied

by the Mayor and Chief Engineer of that ci y. Twenty-two New Haven firemen Chief Engineer. From Biddeford, Maine, Bridgeport, Conn., New Bedford and other places came eager offers of assistance, and on every hand last night there were brave, generous men from all the towns and cities about us, working with all their strength to stay the progress of the terrible enemy. # THE CITY.

We love to see people enjoy themselves, and therefore took an active interest in the efforts made by a young couple at Dr. Hoyte's Church Sunday evening, to have the time pass pleasantly. The young lady was rather good looking, stylishly appareled, and made a prominent display of a diamond ring, which she evidently considered of greater value than the "Pearl of great price," which was the subject of the minister's discourse. The young man wore good garments, fashionably cut, and, judg ng from his appearance, is a young gentleman of more than ordinary intelligence. before, and had probably found the services somewhat uninteresting, as they took the precention Sunday evening to guard against ennui by taking of with them a large package of photographs of acquaintences, and a bundle of old letters—probably tender billet doux, which they have written each other, wherein "love" rhymes with "dove" and "heart" with "dart," and after spending half ar hour in making excruciatingly funny remarks with regard to the appearance of an old gray headed gentleman who sat off to helf right, against the wall, they whiled away the remainder of the time of service

The National Museum at Naples is most abundantly supplied with curiosities made from lava and found at Pompeii and Herculaneum, embracing terra cotta work, paintings, mural pictures, and various statuary, of which latter is to be seen a beautiful Apollo Belvidere. The specimen presented us is a medallion of Venus, its sittings being of gold which thereby prevent the edges of the lava scaling. ing off. THE CENTRE OF POPULATION.

India rivers are apt to change their courses it is stated that since 1785 the Brahmaputra has shifted its main channel nearly two hundred miles wes ward, ruining many ancient cities and giving birth to many new centres of trade and population. Thus Sonargaog, the old capital of Bengal, deserted by the Brahmaputra River, has been reduced to a mean village, while Sersiganj, on the new channel, has become a vast trading market. Those changes in river channel nearly in 1870 it has still "gone west," but not so rapidly as in ei her of the preceding ten years, it having moved only forty-five miles, and is now at Washington, in Clinton county, Ohio. The Professor deduces from his very curious calculations, that in the year 1900 the centre of population will be near Bloomington, Indiana, about forty-five miles southwest of Indianapolis.
